NOTES FROM THE EDITOR:

Many thanks to Mark Zukaitis of New York for the superb job he has done compiling the enclosed index of the first 9 volumes of CrossWords. I have already used it to locate information in the back issues, and I'm sure everyone will find it a valuable reference source. As if that weren't enough, Mark has agreed to keep the index updated yearly. On behalf of all of us, our sincerest thanks, Mark!

It is time once again to send in your renewal for 1987. The form is located on the inside back page. Dues are still a bargain at \$5 a year. Where else could you find detailed information on gesneriad hybridizing except in CrossWords?

As I mentioned in the last issue, there will be a slight change in the printing schedule of CrossWords next year. Look for the first issue of 1987 sometime in January/February.

As 1986 draws to a close, I would like to thank the members of the coordinating committee of GHA for their hard work: Meg Stephenson, Secretary and Treasurer, who manages to keep dues and renewal notices straight in spite of a heavy work schedule; Marty and Zelda Mines, who miraculously turn my rough drafts and scratches into the fine finished product that arrives in your mailbox; Dave Zaitlin, who coordinates the Seed Fund while attending school at Harvard; and contributing editor John Boggan, whose constant stream of articles for CrossWords makes my job as editor so much easier. I'd also like to thank Peg Belanger for her continued inspiration and support.

And a special thank you to those members who have written articles in the past. I hope your support will continue, and that others who have not yet written for CrossWords will give it a try.

See you in '87.

- Al Wojcik
